01 PROFILE

I am an experienced software engineer with over 8+ years of coding passion within my fingertips. I'm Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team as can be seen with the very recent **Foodin City**, and Coin Drop platforms that just launched by **Cube Team**. These projects require a ton of my expertise to realize them and I am very happy to share my skill set with you. I am proficient in many programming languages and embedded systems, great at web development and iOT too with the results to prove. I would like to discuss more on my past projects and provide more detail if you would give me the chance.
